### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a lithium secondary battery comprising an electrolytic solution, a separator, and an electrode structure, which electrode structure comprises a plurality of positive electrodes and negative electrodes, said electrodes being in the form of layers, wherein outermost electrodes of said structure are negative electrodes, wherein a back coat layer is formed on each of said outermost electrodes and covers the entire surface of said outermost electrode, wherein the back coat layers contain at least an inorganic material as a filler and/or a resin, and wherein only the outermost electrodes are covered with said back coat layers.

In the prior art of record, Ahn et al., U.S. Pat. No. 6,881,514, discloses a back coat layer as a current collector.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious, a lithium secondary battery comprising electrodes in the form of layers, wherein the outermost layer is a negative electrode on which is a back coat layer, containing an inorganic material as a filler and/or resin, and only the outermost electrodes are covered with back coat layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
